EDUCATION

- Meghnad Saha Institute of Technology** Kolkata, India
Bachelor of Technology - Computer Science and Engineering: CGPA: 9.31/10.0 July 2020 - June 2024

SKILLS

- Languages:** Java (Data Structures and Algorithms), C/C++, JavaScript
- Web Development:** NodeJS, ExpressJS, MongoDB, RESTful API, ReactJS, NextJS
- Database:** MYSQL, MongoDB, Firebase Realtime Database, Firebase Firestore
- Tools:** Git, GitHub, Postman API, VS Code, Firebase, IntelliJ IDEA
- Miscellaneous:** Object Oriented Programming, Operating System, Computer Networks, Database Management System

WORK EXPERIENCE

- BasketHunt - Internship**  **Remote**
Web Developer Intern Jan 2023 - Mar 2023
 - Tech Stack:** HTML, CSS, JS and PHP
 - Contributions** - : Collaborated with a team to transform Figma designs into functional web pages. Implemented responsive design principles to ensure optimal user experience across different devices and screen sizes. Successfully met project deadlines and contributed to the overall development process.
 - Learning:** Learned some new technologies and to meet aggressive delivery schedules.

PROJECTS

- Snapthreads**  **GitHub** 
Full Stack Development Nov 2023 - Present
 - Tech Stack:** NextJS, Clerk, MongoDB, Node.js, Tailwind, Shadcn, Uploadthing Docs, Express.js, React, and more.
 - About:** Developed a full stack application called Snapthreads, a platform where users can share thoughts, similar to Twitter, and maintain streaks by posting regularly. **Implemented features like community forums and user authentication.**
 - Key Features:** Implemented streaks functionality inspired by **Snapchat**, allowing users to maintain consecutive posting streaks. Integrated Tailwind for styling and Shadcn for components like forms, inputs, and textareas. Used Uploadthing Docs for efficient image uploading to the **MongoDB backend.**
 - Learning:** Gained proficiency in backend development, incorporating various technologies for a seamless user experience.
- Cost Explorer**  **GitHub** 
Web Development Aug 2023 - Present
 - Tech Stack:** ReactJs, HTML, CSS, JavaScript, SpeechRecognition, Translation, Recipe Retrieval, Local Storage, Responsive Design.
 - About:** Developed a feature-rich web app with functionalities including **cost estimation, real-time multilingual translation, discount calculation, recipe and ingredient finding, to-buy list management**, and more. Enhanced user experience with responsive design and **offline access capabilities.** Continuously updated and maintained the application based on **user feedback** and **emerging trends.**
 - Learning:** Increased proficiency in ReactJs, **API integration** and user-centered design through the development of a feature-rich web application.
- ChitChat**  **GitHub** 
Web Development Aug 2022 - Sept 2022
 - Tech Stack:** HTML, CSS, JavaScript, SocketIO, NodeJS and Figma.
 - About:** Developed a **secure chat app** enabling users to communicate by creating unique room IDs, ensuring privacy and **eliminating the need for sharing personal data.** Boosted app responsiveness by **50% to 70%.** Added **Notification sounds** for user engagement.
 - Learning:** Learnt to implement a real-time server-client communication using SocketIO. Learnt to design better UI/UX.

CODING PROFILES AND LINKS

Leetcode - Solved over 500+ Questions 

GeeksForGeeks - Solved over 400+ questions 

Coding Ninjas - Solved over 600+ Questions 

GitHub - <https://github.com/adnan-sam> 

AWARDS AND ACHIEVEMENTS

- Under top **10 Geeks** in College's Geeks For Geeks Portal out of 1100 registered Geeks - Jun '23
- 5 Star** in HackerRank
- Expert** at Coding Ninjas - Oct '22
- Built **Arduino-based Automatic Dustbin**, recognized for its innovation and functionality. - Mar '22
- Completed **HacktoberFest 2022** - Oct'22
- Got Shortlisted out of **8,000** people for Attending **Google DevFest 2022** - Nov'22
